

Grayson-Jockey Club Research Foundation has funded the following research in connection with Colic since 1999.

Ethyl Pyruvate Improves Survival in Large Colon Volvulus

Michigan State University

Principal Investigator: Susan Holcombe

Effect of Diet and Fluid Administration on Colonic Ingesta

Marion duPont Scott Equine Medical Center Virginia-Tech

Principal Investigator: Nathaniel A White II

Flunixin or Firocoxib in Postoperative Colic Patients

North Carolina State University

Principal Investigator: Anthony Blikslager

Pathogenesis of Acid Injury in the Non-Glandular Region of the Equine Stomach

University of Tennessee

Principal Investigator: Frank M. Andrews

Colonic Pathophysiology in Horses Administered Phenylbutazone

Louisiana State University

Principal Investigator: Rebecca S. McConnico

Factors Affecting Omeprazole Pharmacokinetics in Horses EPM

University of Queensland

Principal Investigator: Paul Mills

The Role of Volatile Fatty Acids and Calcium in Gastric Ulcer Disease

University of Tennessee

Principal Investigator: Frank M. Andrews

Pharmacodynamic Evaluation of Omeprazole

University of Queensland

Principal Investigator: Paul Mills

Excitatory & Inhibitory Neuromuscular Transmission in the Horse Cecum

Washington State University

Principal Investigator: David A. Schneider

Factors Affecting Omeprazole Pharmacokinetics in Horses EPM

University of Queensland

Principal Investigator: Paul Mills
