Issue 1 • 2025

STALLION STATISTICS SEEKING DURABILITY, SOUNDNESS

This special edition of equine research news, features the stallion durability statistics.

Accompanying is the 17th annual listing of stallions by two criteria as developed by the Durability Committee of the Welfare and Safety of the Racehorse Summits underwritten by The Jockey Club and Grayson-Jockey Club Research Foundation. The aim is to highlight stallions which are commercially viable AND produce progeny statistics which would tend to indicate above average performance in two areas----average number of starts per starter and percentage of foals that race.

To qualify for the lists, a stallion must have ranked within the first 200 sires by progeny earnings for the calendar year 2024.

2024 Sires by Lifetime Starts per Starter

This assures some success and relevance to the commercial breeding and sales market. For purposes of this presentation, we have rearranged that population by the two criteria stated and for each list have included the top one-half (100 stallions) of the original population of 200 by earnings.

Although stallions qualify for these lists based on 2024 progeny earnings alone, other statistics given here are lifetime through Dec. 31, 2024.

(All Northern Hemisphere earnings, except from Japan, are included in these statistics, which were provided by The Jockey Club Information Systems.)

The average of the breed in recent crops has been a career of around 15.9 starts per starter. Thus, we see that roughly only 23% of the top 200 stallions in earnings reach this average.

Join Us In Saving Horses Through Equine Research

The average of the breed insofar as percentage of horses that reach the races is around 75.01 percent, so we see 41% of the top 200 stallions reach that mark. The underlying premise of these statistics, and of the Durability Committee, is that the national reduction in average starts per starter might be seen as an indication of a decrease in durability of the breed.

The average starts per year for North American starters have decreased, from about 11 in 1960 to under around 6 since 2021. It has been under 7 since the year 2001. It is understood that the average number of starts can be a function of many elements, some management based. For example, the salvage value of highly fashionably bred runners as breeding animals often

Review our video links to Vet Chats, Research At Work, Welfare & Safety Webinars... and much more discourages continuing to race a young horse once any problem develops.

We also understand that no statistical presentation can serve as a single indicator of success. The trade media for years have published sire statistics based on earnings, but also have provided a plethora of other measures, indices, percentages of stakes winners, etc. In that vein, it is hoped that the accompanying statistics provide yet another kind of insight into contemporary stallions' progeny, whether an individual stallion is seen as a candidate to breed to or as the sire of weanlings, yearlings, 2-year-olds, or broodmares.

All statistics provided by:

2024 Sires by Lifetime % of Foals of Racing Age Started

Top 2024 Sires of Stakes Winners 4 Years Old & Up

OLDER STAKES WINNERS

Following is a simple ranking of sires of 2024 by their number of stakes winners 4 years old and upward, with additional recognition of their graded stakes winners of those ages last year. For this list, there was no requirement concerning progeny earnings, but it does include those with more than three stakes winners that were 4 years old or older in 2024. It should be noted, however, that the leaders on this list are also familiar names from various trade media lists arranged by more fashion-driven criteria.

Rank Sire	Stakes Winners 4YO & up	Graded Stakes Winners 4YO & up
1 Into Mischief	18	8
2 Curlin	10	10
3 Not This Time	8	4
Gun Runner	8	6
